PRACTICAL 6

Servlet - Request Redirection Develop an application for the following: User should be redirected to the URL entered in location text box.

CODE:

index.html

```
<!DOCTYPE html>
<html>
<head>
   <title>Request Redirection</title>
</head>
<body>
   <h2>Servlet Request Redirection</h2>

   <form action="RedirectServlet" method="post">
      Enter URL:
      <input type="text" name="location"
placeholder="https://www.google.com">
      <br><br>
      <input type="submit" value="Go">
   </form>
</body>
</html>
```

RedirectServlet.java

```
import java.io.*;
import javax.servlet.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;

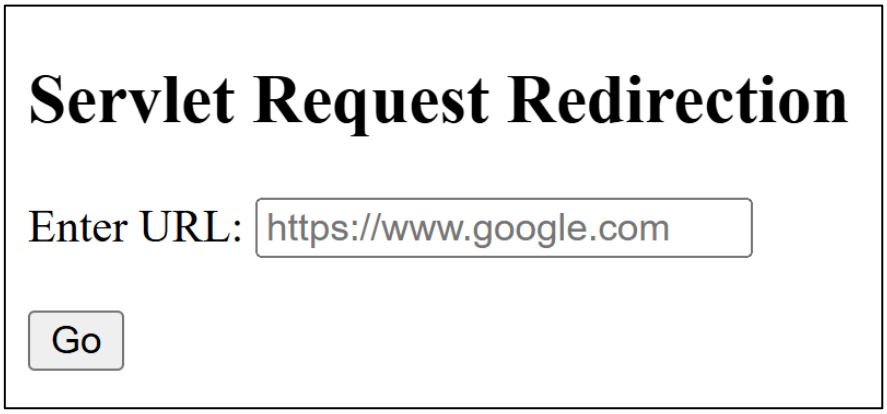
@WebServlet("/RedirectServlet")
public class RedirectServlet extends HttpServlet {

   protected void doPost(HttpServletRequest request, HttpServletResponse
response)
         throws ServletException, IOException {

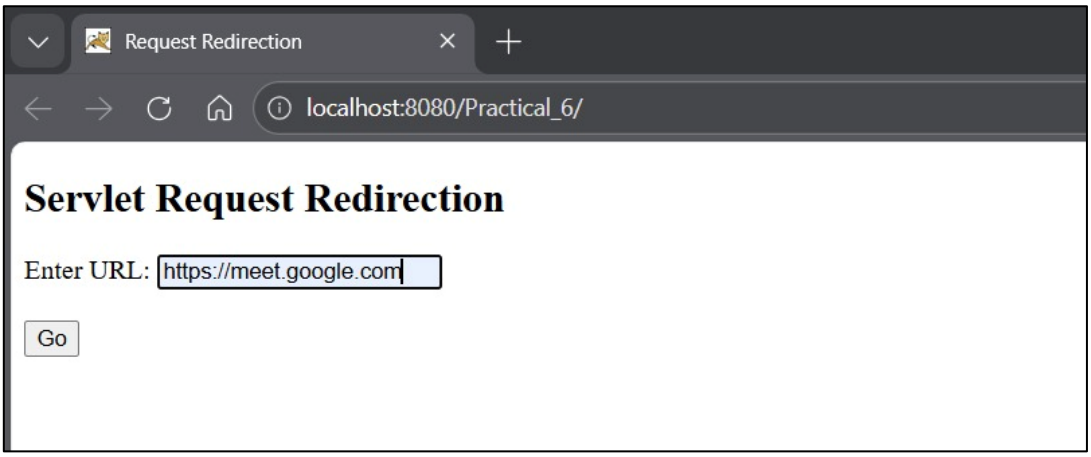
      String url = request.getParameter("location");

      if (url != null && !url.isEmpty()) {
         response.sendRedirect(url);
      } else {
         response.setContentType("text/html");
         PrintWriter out = response.getWriter();
         out.println("<h3>Please enter a valid URL</h3>");
      }
   }
}
```

OUTPUT:



Servlet Request Redirection
Enter URL:
https://www.google.com
Go



Request Redirection
localhost:8080/Practical_6/
Servlet Request Redirection
Enter URL:
https://meet.google.com
Go
